

## TECTECTEC VPRO500

The TecTecTec VPRO500 pictured weighs just 6.5 oz including the CR2 battery. This brand and model of rangefinders does not have a standard tripod socket as some rangefinders do. So with your Quick Clip, we include 3 (two spares) of our belt clip tab/3M adhesive disk assemblies (pictured). The picture of your TecTecTec VPRO500 at the right has a white circle drawn on the laser lens end. This is where you need to carefully place the belt clip tab/3M adhesive disk assembly for the optimal center of gravity.

Using the included alcohol cleaning pad (simple isopropyl alcohol), clean the spot on your TecTecTec VPRO500 and allow to air dry. This removes any oils, sweat, grease and other yucky stuff so the adhesion is optimized. Peel the paper backing off of one of the belt clip tab/3M adhesive disk assemblies. Carefully place the belt clip hook on the white circle as shown in the picture. CAUTION: The belt clip tab/3M adhesive will want to stick immediately to whatever it touches so use care when placing it on the spot and try not to touch the adhesive with your fingers. Apply some pressure on the belt clip hook for about 30 seconds.

THIS IS VERY IMPORTANT: Allow it to “set” for 48 to 72 before using your TecTecTec VPRO500 on the Quick Clip. That will further enhance the adhesive properties of the 3M adhesive disk. If you ever need to remove the belt clip tab, simply warm the adhesive with a hair dryer. The adhesive will soften and you can peel off the belt clip tab, though it still won’t be easy. Don’t try to re-use that 3M adhesive that you peeled off as it loses some of its adhesiveness. Remove it and use a fresh adhesive disk. You can re-use the belt clip tab. Remove any remaining adhesive and clean it with an alcohol pad or a clean cloth with a dab of isopropyl alcohol. Carefully (again see CAUTION above) place the fresh 3M adhesive disk on the belt clip tab.

### VERY IMPORTANT – PLEASE READ

If you follow these directions “to the letter” the belt clip tab/3M adhesive disk assembly will stick instantly and you should not be to remove it using your fingers/hands (you may draw blood). It certainly cannot come off during your everyday use on the golf cart.

***If you have any doubts at all about the strength, flexibility and holding power of the 3M VHB adhesive, please click on the link below. If you have any trouble opening it, simply right-click directly on the link then click on “Open Hyperlink”. Or you can also copy the link and paste it into your web browser address line:***
